The Best Choice road to excellent home care

Best Choice attends to the physical needs of our clients by assisting with the clients' activities of daily living.

Our experienced home care staff are screened, bonded and insured and supervised by a Registered Nurse.

We are available 24 hours a day, 365 days a year for all your home health care needs.

We Make it Easy.

www.bethabe.org

Best Choice makes it easy to get the excellent home health care you're looking for.

After his surgery, Arthur L. needed someone in his home to help him be more confident with his new routine. His doctor called Best Choice, and Arthur received the advice and services he needed to feel independent, comfortable, and secure.

Best Choice is a home health care and supplemental staffing service that was established in 1996. We offer a full range of high-quality, cost-effective in-home care services for the elderly, sick or homebound in the boroughs of New York City and Westchester County.

Best Choice offers specialized services

If an injury, hospitalization or other medical condition requires you, a family member or your patient or client to need home care services, whether on an hourly, daily, short-term or long-term basis, Best Choice will match your health care requirements with an appropriate level of well qualified, well-trained personnel to meet your needs.

A range of Best Choice service options

Several specialized Best Choice options make the most of a home health care visit by registered nurses, home health or personal care aides:

Flexible Aide Service allows a client to have home health aide or personal care aide services for as long as needed. This allows the aide to be scheduled around a group of tasks which may better suit the client's needs.

Companion Service is a special option offering assistance and support for patients needing someone to accompany them to a doctor's visit, grocery shopping, or just to help navigate the neighborhood in a wheelchair or walker.

PERS: a life-saving link for Best Choice clients

A small pendant, worn around the neck, can serve as an around-the-clock life-saving communications link for a patient, parent or friend.

In the event of an accident, illness or injury, one touch of the button on the simple PERS pendant immediately activates a telephone voice response through the base unit.

If no one answers the phone call, a specially trained technician at the emergency response center calls 911 medical units and the family members and friends listed as contact persons in case of emergency.

Vital information about the client is collected when the PERS equipment is installed and kept on file so that responding agencies know the medical history of the client before they arrive.

For a small monthly maintenance fee, the Personal Emergency Response System (PERS) is available to Best Choice patients and clients.
